(54) **System for ordering reprints**

(57) A negative sheet (1) for storing piece negatives (10) has reorder information recording sections (6) formed thereon for recording reorder information on the piece negatives (10), respectively. A printer/processor (100) determines additional printing conditions for image frames (10a) to be additionally printed, based on the reorder information read by a detector (93) from the

reorder information recording sections (6) of the negative sheet (1) fed to the printer/processor (100). The piece negatives (10) to be additionally printed are drawn out of the negative sheet (1), and the image frames (10a) are printed on printing paper with the additional printing conditions determined.
